Turning Your Phone ON and OFF

Turning Your Phone ON

- ▶ To turn your phone on, press **END/0**.

Once your phone is ON, it displays “Looking for service...” which indicates that your phone is searching for a signal. When your phone finds a signal, it automatically enters standby mode. At this point, you are ready to begin making and receiving calls.

If your phone is unable to find a signal after 15 minutes of searching, a Power Save feature is automatically activated. When a signal is found, your phone automatically returns to standby mode.

In Power Save mode, your phone searches for a signal periodically without your intervention. You can also initiate a search for service by pressing any key (when your phone is turned ON).

Tip: The Power Save feature helps to save your battery power when you are in an area where there is no signal.

Turning Your Phone OFF

- ▶ Press and hold **END/0** until you see the powering down animation on the display screen.

Your screen remains blank while your phone is off (unless the battery is charging).

Using the Battery

Installing the Battery

To install the Lilon battery:

- ▶ To install, insert the battery into the opening on the back of the phone and gently press down until the latch snaps into place.

Removing the Battery

To remove your battery:

1. Make sure the power is off so that you don't lose any stored numbers or messages.
2. Press the battery release latch up and remove the battery from the phone at a 45-degree angle.

Charging the Battery

Your phone comes with a rechargeable battery. You should charge the battery as soon as possible so you can begin using your phone.

Keeping track of your battery's charge is important. If your battery level becomes too low, your phone automatically turns off and you will lose all the information you were just working on. For a quick check of your phone's battery level, glance at the battery charge indicator located in the upper-right corner of your phone's display screen. If the battery charge is getting too low, the battery icon  appears and the phone sounds a warning tone.

Always use an approved travel charger or vehicle power adapter to charge your battery.

Warning! Using the wrong battery charger could cause damage to your phone and void the warranty.

Note: Long backlight settings, searching for service, vibrate mode, and browser use affect the battery's talk and standby times.

Using the Travel Charger

To use the travel charger provided with your phone:

1. Plug the travel charger into a wall outlet.
2. Plug the other end of the travel charger into the phone's charger jack (with the battery installed).

Charging when your phone is turned on:

The battery icon  appears on the display while charging.

The battery icon turns to  when charging is complete.

Charging when your phone is turned off:

The battery icon  appears, and the message "BATTERY CHARGING-Power Off-" is shown on the display while charging. When the battery is completely discharged, you may wait for several minutes until the message is shown on the display. The battery icon turns to , and message changes to "CHARGING COMPLETE-Power Off-" when charging is complete.

Tip: Be sure to watch your phone's battery level indicator and charge the battery before it runs out of power.

Displaying Your Phone Number

1. Press  to access the main menu.
2. Highlight **Contacts** and press .
3. Highlight **My Phone#** and press .

Note: To access the phone's main menu, press  from standby mode. Menu items may be selected by highlighting them with the navigation key and pressing , or you can press the number corresponding to the menu item on your keypad.

Changing the Faceplate

Removing the Faceplate

- ▶ Press down on both edges of the faceplate and slide it to remove.

Installing the Faceplate

- ▶ Fit the hooks into the notches and slide the faceplate until it snaps into place.

Making and Answering Calls

Making Calls

To place a call using your keypad:

1. Make sure your phone is on.
2. Enter a phone number from standby mode. (If you make a mistake while dialing, press **BACK** to erase one digit at a time. Press and hold **BACK** to erase the entire number.)
3. Press **TALK** or **SPEAKER**.
4. When you're finished, press **END/0**.

Tip: To redial your last outgoing call, press **TALK** or **SPEAKER** twice.

Important: When you use your phone to maximize performance, extend the antenna and do not touch the antenna.

To place a call with the flip closed:

1. Make sure your phone is on.
2. Press and hold  on the right side of the phone.
3. Follow the system prompts. (The call will be made in speakerphone mode, unless you have a headset attached to the phone.)
 - ▶ **Redial** to redial the last number you called.
 - ▶ **Voice Dial** to use the Voice Dial function (see “Using Voice-Activated Dialing” on page 84).

Tip: This function is available only when the Side Key Guard setting is off. See page 51 for the Side Key Guard.

Note: To use a Voice Dial, you must have stored Voice Dial entries (see “Programming Voice Dial Tag to Your Phone” on page 84).

Dialing Options

Dialing options are displayed when you press **Options** (right softkey) after entering numbers in standby mode.

To select an option, highlight it and press .

- ▶ **Call** to dial the phone number.
- ▶ **Call:Speaker On** to dial the phone number in speakerphone mode.
- ▶ **Send Message** to send a text, picture, or video message (mobile numbers only). (See page 112, 140 or 141.)
- ▶ **Save Phone#** to save the phone number in your Contacts list. (See “Saving a Phone Number” on page 21.)
- ▶ **Find** to display Contacts list entries that end with the digits you entered. (See “Finding a Phone Number” on page 22.)
- ▶  **Hard Pause** to insert a hard pause. (See “Dialing and Saving Phone Numbers With Pauses” on page 22.)
- ▶  **2-Sec. Pause** to insert a 2-second pause. (See “Dialing and Saving Phone Numbers With Pauses” on page 22.)
- ▶ **Hyphen** to insert a hyphen manually where you like.

Tip: To Speed Dial a phone number, press and hold the appropriate Speed Dial location from 2-9. See page 69 for setting.

Answering Calls

To answer an incoming call with the flip open:

1. Make sure your phone is on. If your phone is off, incoming calls go to voicemail.
2. Press **TALK** or **SPEAKER** to answer an incoming call. (Depending on your phone's settings, you may also answer incoming calls by opening the phone or by pressing any number key. See "Setting Any Key Answer" on page 44 for more information.)

To answer an incoming call with the flip closed:

1. Make sure your phone is on. (If your phone is off, incoming calls go to voicemail.)
2. When your phone rings or vibrates, press and hold the 10-4 button (**10-4**) on the left side of the phone or press and hold the Side Call key (**10-4**) on the right side of the phone. (The call will be answered in speakerphone mode.)
- or -
Open the phone to use the earpiece.

Note: If the setting for Open Flip is not set to **Answer Call**, opening the phone will not answer the call. (See "Setting the Open/Close Flip Option" on page 50.)

Your phone notifies you of incoming calls in the following ways:

- ▶ The phone rings or vibrates.
- ▶ The LED flashes.
- ▶ The backlight illuminates.
- ▶ The screen displays an incoming call message.
- ▶ If available, the phone number of the caller is displayed.
- ▶ If the phone number is in your Contacts list, the contact's name is displayed.

The following options are also displayed by pressing **Options** (right softkey).

To select an option, highlight it and press .

- ▶ **Answer** to answer the call.
- ▶ **Answer:Speaker** to answer the call in speakerphone mode.
- ▶ **Answer on Hold** to put the call on hold. (See “Setting Answer on Hold” on the next page.)
- ▶ **Screen Call** to answer the call by using pre-recorded announcement. (This feature appears when you are in service area or digital roaming area.) See page 89 for setting up.
- ▶ **Quiet Ringer** to mute the ringer. (This feature appears when the ringer is set.)

Note: If your phone is off, incoming calls go to voicemail.

Setting Answer on Hold

This feature allows you to hold an incoming call when you cannot answer immediately.

To set Answer on Hold:

1. When you receive an incoming call, press **Options** (right softkey).
2. Highlight **Answer on Hold** and press **MENU OK**. (The caller hears a message while waiting for you to answer. **OH** will display on the screen while the call is on hold.)

To resume the call:

- ▶ Press **Answer** (left softkey) or **TALK**.
- or -
- ▶ Press **Options** (right softkey), highlight **Answer** or **Answer:Speaker** and press **MENU OK**.

Note: Answer on Hold is not available in analog areas.

Ending a Call

With the flip open:

- ▶ Close the phone or press **END/O**.

With the flip closed:

- ▶ Press and hold **END/O**.

Note: If the setting for Close Flip is not set to **End**, closing the phone will not end the call. (See “Setting the Open/Close Flip Option” on page 50.)

Tip: Time/Date is displayed when you press **BACK** while the phone is in use.

Using the Speakerphone

The speakerphone feature lets you hear audio through the speaker and talk without holding the phone. When the speakerphone is activated, use the Side Up/Down key or press the navigation key up or down to adjust the volume.

To turn the speakerphone on during a call:

▶ Press .

- or -

Press  (right softkey), highlight **Speaker On**, and press .

To turn the speakerphone off during a call:

▶ Press .

- or -

Press  (right softkey), highlight **Speaker Off**, and press .

Changing the Ringer Volume

To change the ringer volume, adjust the Side Up/Down key when the phone is in standby mode.

Note: To change the ringer volume from the main menu, see “Adjusting the Phone’s Volume Settings” on page 32.

Adjusting Volume During a Conversation

Whether you need to hear more or less of a conversation, adjust the Side Up/Down key or press the navigation key up or down during a call.

Muting a Call

To mute a call:

- ▶ Press **Options** (right softkey), highlight **Mute**, and press **MENU OK**.
(When the phone is muted, “**Muted**” appears on the display.)

To unmute a call:

- ▶ Press **Options** (right softkey), highlight **Unmute**, and press **MENU OK**.

Tip: To use this feature with the flip closed, press **END CALL** (located on the side of your phone).

Displaying the Missed Call Notification

When an incoming call is not answered, your phone displays the Missed Call log and the  icon are displayed on your screen.

To call the Missed Call entry:

- ▶ Press **TALK** or **SPEAKER**.

Tip: If you have two or more notifications, the event list will appear.

To erase the Missed Call log:

Tip: If you press **END CALL** before checking your notification, **Events** (right softkey) appears in standby mode. Press **Events** (right softkey) to display the notification list. To call the entry, highlight the entry and press **Call** (left softkey).

Calling Emergency Numbers

You can place calls to 911 (dial **WAYZ 9** **1** **1** and press **TALK**), even if your phone is locked or your account is restricted. Once the dial is made, you will enter Emergency mode.

To select an option, press **Options** (right softkey), highlight it, and press **MENU OR**.

Options:

- ▶ **Speaker On** to activate speakerphone mode. (If you are in speakerphone mode, the option will appear as **Speaker Off** to deactivate.)
- ▶ **Unlock Phone** to unlock your phone (appears only if the phone is locked).
- ▶ **Close Menu** to close the pop-up menu (appears only if the phone is unlocked).

Tip: Press **My Phone** (left softkey) to display your phone number during Emergency mode.

To exit Emergency mode:

1. Press **END/O**.
2. Press **Options** (right softkey) to display the options.
3. Highlight **Exit Emergency** and press **MENU OR**.

Note: When you are in Emergency mode, you can only exit from the options menu.

To select Emergency mode options:

1. Press **END/O** during a 911 call.
2. Press **Options** (right softkey).
 - ▶ **Call 911** to call 911.
 - ▶ **Call 911:Speaker** to call 911 in speakerphone mode.
 - ▶ **Exit Emergency** to exit Emergency mode.
3. Select an option and press **MENU OR**.

In-Call Options

During a call, your phone displays menu options by pressing **Options** (right softkey).

To select an option, highlight it and press .

- ▶ **Flash** to answer an incoming call while putting the current call in Call Waiting or connect a third party for a Three-Way Call.
- ▶ **Mute** to mute your phone's microphone. Select **Unmute** to reactivate the microphone.
- ▶ **Speaker On** or **Speaker Off** to activate or deactivate speakerphone mode. You can adjust the speakerphone volume using the Side Up/Down key.

Warning! Due to higher volume levels, do not place the phone near your ear during speakerphone use.

- ▶ **Three-Way Call** to call a third party.
- ▶ **Call History** to access the Call History menu. (See “Managing Call History” on page 62.)
- ▶ **Contacts** to access the Contacts menu. (See “Contacts Directory” on page 65.)
- ▶ **Messaging** to access the Messaging menu. (See “Messaging” on page 110.)
- ▶ **Settings** to access the Settings menu. (See “Your Phone’s Settings” on page 29.)
- ▶ **Tools/Extras** to access the Tools/Extras menu. (See Calendar menu instructions on page 73.)

Note: The Flash menu only appears in Call Waiting and in Three-Way Calling. Mute menu does not appear during a 911 call.

End-of-Call Options

To display the following options, press **Options** (right softkey) within 10 seconds after disconnecting a call.

To select an option, highlight it and press .

- ▶ **Call Again** to dial the phone number.
- ▶ **Call:Speaker On** to dial the phone number in speakerphone mode.
- ▶ **Save Phone#** to save the phone number in your Contacts list. **Go to Phone Book** appears when the number is already in your Contacts list. (See “Saving a Phone Number” below.)

Note: The End-of-Call options are not displayed for calls identified as No ID or Restricted.

Saving a Phone Number

Your phone can store up to seven phone numbers in each of 300 Contact entries with up to 500 total numbers. Each entry's name can contain 16 characters. Your phone automatically sorts the Contacts alphabetically.

1. Enter a phone number.
2. Press **Options** (right softkey).
3. Highlight **Save Phone#** and press .
4. Select a label by highlighting **Mobile**, **Home**, **Work**, **Pager**, **Fax**, **Other**, or **No Label** and press .
5. Enter a name and press .
Once you have stored an entry in the Contacts list, you are prompted to select the following entry modes:
 - ▶ **New Name** to enter a name directly.
 - ▶ **From Ph. Book** to select a name from the Contacts entry list.
6. Press **Save** (left softkey).

Finding a Phone Number

You can search Contacts list entries for phone numbers that contain a specific string of numbers.

1. Enter the last four or more digits of the number and press **Options** (right softkey). The more numbers you enter, the more specific the search becomes.
2. Highlight **Find** and press **MENU OK**. The Contacts entry that ends with the digits you entered appears.
3. Highlight your desired entry.
Press **MENU OK** to display the entry details.
Press **TALK** or **SPEAKER** to dial.

Dialing and Saving Phone Numbers With Pauses

You can dial or save phone numbers with pauses for use with automated systems, such as voicemail or credit card billing numbers.

There are two types of pauses available on your phone:

- ▶ **Hard Pause** sends the next set of numbers when you press **TALK**.
- ▶ **2-Sec. Pause** automatically sends the next set of numbers after two seconds.

Note: You can have multiple pauses in a phone number and combine 2-second and hard pauses.

1. Enter the phone number and press **Options** (right softkey).
2. Highlight either **Hard Pause** or **2-Sec. Pause** and press **MENU OK**. Hard Pauses are displayed as a “H” and 2-second pauses as a “T”.
3. Enter additional numbers.

4. Roaming

Understanding Roaming

Recognizing Icons on the Display Screen

Your phone's display screen always lets you know when you're off the home network and whether your phone is operating in analog or digital mode. The following chart indicates what you'll see depending on where you're using your phone.

Network	Indicator
Digital Home	
Analog Home	
Digital Roaming	 Digital Roam
Analog Roaming	 Analog Roam

Roaming on Digital Networks

When you're roaming on digital networks, your call quality and security will be similar to the quality you receive when making calls on the home network. You may not be able to access certain features, such as the Web.

Roaming on Analog Networks

When you roam on analog networks, you will experience a similar quality provided by other analog carriers today. Although some features, such as Web, will be unavailable, you can still make and receive calls. You will experience a few differences:

- ▶ You are more likely to experience cross-talk, fade-out, and dropped calls.
- ▶ Some features which are standard on the home network are unavailable.
- ▶ There are security and privacy risks (eavesdropping and cloning) that exist with conventional analog services today.
- ▶ Your battery needs recharging sooner when you use your phone for analog roaming.

Note: When using your phone in analog mode, the handset may feel warm. This behavior is normal for analog operation.

Setting Your Phone's Roam Mode

Your phone allows you to control your ability to roam. By using the **Roaming** menu option, you can determine which signals your phone accepts.

Set Mode

Choose from four different settings on your dual band/tri mode phone to control your roaming experience.

1. Press  to access the main menu.
 2. Highlight **Settings** and press .
 3. Highlight **Roaming** and press .
 4. To select an option, select it and press .
- ▶ **Automatic:** This setting seeks a service. When a service is unavailable, the phone searches for an alternate system.
 - ▶ **Home Only:** This setting allows you to access the home network only and prevents roaming on other networks.
 - ▶ **Digital Only:** This setting forces the phone to seek a digital system.
 - ▶ **Analog Only:** This setting forces the phone to seek an analog system.

 - ▶ **Disable:** Disables your phone’s 10-4 service; you will not be able to make or receive 10-4 calls or access your 10-4 contacts.

10-4 Call Alerts

There are several ways your Phone alerts you during 10-4 calls.

When you make or receive a 10-4 call:

- ▶ The phone beeps (depending on the Ringer Type).
- ▶ The backlight illuminates.
- ▶ The screen displays a 10-4 call message.
- ▶ The other party’s 10-4 number and name (if available) are displayed.
- ▶ The screen displays who has the floor.

The status of a 10-4 call:

- ▶ The Green LED On indicates you have the floor and may speak.
- ▶ The Red LED On indicates another contact has the floor.
- ▶ The LED Off indicates the floor is open. (You can take the floor and speak by pressing and holding .)

Displaying the 10-4 List

- ▶ From standby mode, press **10-4** (left softkey) or the 10-4 button on the side of your phone () to access the 10-4 List.

Tip: The first time you access the list, the 10-4 Help message will appear. Press **Yes** (left softkey) and **Next** (left softkey) to read a brief introduction of 10-4.

Selecting Contacts Lists

When your phone displays a 10-4 List, the left softkey is labeled **Go to**. To switch to another contacts list, press the left softkey, highlight your desired list, and press .

- ▶ **Company List/Company Grps.** contain company-provided contacts (up to 200 entries). Your company list can only be created and modified by an authorized administrator on the 10-4 server. When the lists are empty, Company List/ Company Groups will not appear on the display. You cannot add, edit, or delete Company List items, but you can copy entries to your Personal List/Personal Groups.
- ▶ **Personal List/Personal Grps.** contain your personal 10-4 contact names and numbers, separately or in groups. You can create and edit your own Personal List. Your phone can store a total of 200 entries (you may include up to five contacts per group).
- ▶ **Outgoing** shows the last 10 different 10-4 calls you placed.
- ▶ **Incoming** shows the last 10 different 10-4 calls you accepted.
- ▶ **Missed** shows the last 10 10-4 calls you missed.

Tip: You can also select **Enter 10-4#** from **Go to** option to enter a 10-4 number directly. See page 96 for details.

Storing Videos

Your phone's video storage area is called **My Videos**. There are two types of folders in My Videos that can be used separately according to your needs:

- ▶ **In Camcorder** (see below)
- ▶ **Saved to Phone** (see page 136)

In Camcorder Folder

Once a video is recorded, it is automatically saved to the **In Camcorder** folder. From the In Camcorder folder, you can view all of the videos you have taken, store selected videos in your phone, send videos to the online picture/video messaging web site, delete videos, and access additional video options.

To review your stored videos in the In Camcorder folder:

1. Press  to access the main menu.
2. Highlight **Picture&Video** and press .
3. Highlight **My Videos** and press .
4. Highlight **In Camcorder** and press . (Thumbnail stills will display, up to nine at a time.)
5. Use your navigation key to scroll through and select a video.
6. Press **Play** (left softkey) to play the selected video.

Tip: Press the Side Up/Down key up or down to adjust the video volume while playing a video or in the Expanded view mode.

In Camcorder Folder Options

When you are in the In Camcorder folder, several options are available. Press **Options** (right softkey) to display the following options:

- ▶ **Expand** to switch to the Expand view mode.
- ▶ **Thumbnail** to switch to the Thumbnail view mode.
- ▶ **Send Video** to send video files. (See page 141 for details.)
- ▶ **Upload to Albums** to upload videos saved in the In Camcorder folder to the online picture/video messaging web site. Choose from **This Video**, **Selected Videos**, or **All Videos**.
- ▶ **Set as** to assign the video. Select **Ringer** or **Animation** and press .
- ▶ **Display/Edit** to select an option from the following:
 - **Text Caption** to edit the caption of a video.
 - **Video Info** to display information of a video, such as caption, time/date, size, etc.
 - **Sort by** to sort videos by Name, Size, Date-Taken or Date-Uploaded. (Thumbnail view only.)
- ▶ **Delete** to delete videos in the In Camcorder folder. Select **This Video**, **Selected Videos**, or **All Videos**.

Note: Deleting videos will free up memory space in your phone to enable you to take more videos. Once erased, videos cannot be uploaded to your online picture/video messaging account or saved to the Saved to Phone folder.

- ▶ **Save to Phone** to save the selected videos in the Saved to Phone folder.
- ▶ **Go to Saved to Ph.** to display the Saved to Phone folder.
- ▶ **Go to Camcorder** to activate video mode.

Note: **Upload to Albums** and **Save to Phone** copy videos from your phone's In Camcorder folder to your Saved to Phone folder or your online picture/video messaging account. Videos that have been stored in your Saved to Phone folder or uploaded to your online account will remain available in the In Camcorder folder until you erase them.

Note: If this is the first time you have accessed the online picture/video messaging account, you will be prompted to create your online picture/video messaging password. (See "Creating Your Online Picture/Video Messaging Password" on page 116.)

Saved to Phone Folder

When you assign a video, it will automatically be saved in the **Saved to Phone** folder. The Saved to Phone folder allows you to store copies of videos on your phone and to assign videos to various phone tasks.

To save a video to the Saved to Phone folder:

1. Follow steps 1-4 above.
2. Press **Options** (right softkey).
3. Highlight **Reset Voicemail#** and press .
4. Highlight **Yes** and press .

Responding to Call Waiting

When you're on a call, Call Waiting alerts you to incoming calls by sounding beeps. Your phone's screen informs you that another call is coming in and displays the caller's phone number (if it is available and you are in digital mode).

To respond to an incoming call while you're on a call:

- ▶ Press **TALK** (or press **Options** [right softkey], highlight **Flash** or **Flash:Speaker** and press **MENU OK**). This puts the first caller on hold and answers the second call.

To respond to an incoming call when Answer on Hold is activated:

- ▶ Press **TALK** (or press **Options** [right softkey], highlight **Flash** or **Flash:Speaker** and press **MENU OK**). (The Answer on Hold will be automatically deactivated. See page 16 for Answer on Hold.)

To switch back to the first caller:

- ▶ Press **TALK** (or press **Options** [right softkey], highlight **Flash** and press **MENU OK**) again.

Note: Call Waiting may not be available while roaming off the home network.

Making a Three-Way Call

With Three-Way Calling, you can talk to two people at the same time. When using this feature, the normal airtime rates will be charged for each of the two calls.

1. Enter a number you wish to call and press **TALK** or **SPEAKER**.
2. Once you have established the connection, press **TALK** (or press **Options** [right softkey], highlight **Three-Way Call** and press **MENU OK**) to put the first caller on hold.
3. Enter the second number you wish to call and press **TALK** (or press **Options** [right softkey], highlight **Call** or **Call:Speaker On** and press **MENU OK**).
4. When you're connected to the second party, press **TALK** again (or press **Options** [right softkey], highlight **Flash** and press **MENU OK**) to begin your three-way call.

If one of the people you called hangs up during your call, you and the remaining caller stay connected. If you initiated the call and are the first to hang up, all three callers are disconnected.

Web

With Web on your phone, you will be able to browse full-color graphic versions – not just text versions – of your favorite website, making it easier than ever to stay informed while on the go. Check sports scores, trade stocks, and shop all on your phone.

Launching the Web

1. Press  to access the main menu.
2. Highlight **Web** and press .

Net Guard

With the Net Guard setting, the confirmation display will appear to connect to the Internet. This feature helps you avoid accidental connections. You can disable the Net Guard in the future by selecting **Always Auto-Connect** when the Net Guard is displayed.

1. Press  to access the main menu.
 2. Highlight **Settings** and press .
 3. Highlight **Internet** and press .
 4. Highlight **Net Guard** and press .
 5. Select **On** or **Off** and press .
- ▶ **On** to make the Net Guard appear when connecting to the Internet.
 - ▶ **Off** to avoid the Net Guard when connecting to the Internet.

Note: When enabled, the Net Guard appears only once per session. The Net Guard does not appear if the phone is merely re-connecting due to a time-out.

Browsing the Web

Creating a Bookmark

14. Using your Phone's Media Player

Your Multimedia Channel Options

Your new phone offers a variety of accessible audio or video channels, depending on your service plan and multimedia subscriptions. Your subscription options include a comprehensive basic service as well as a full menu of a variety of additional channel options.

- ▶ **Preview Channel:** This free channel lets you sample clips from all of the available channels before you make a decision to subscribe. It's like viewing the movie preview before deciding whether you want to spend the money to go see the full motion picture.
- ▶ **Available Individual Channel Options:** You also have the option of subscribing to individual channels from an extensive menu offering. These channels are available for a monthly subscription fee and allow you unlimited access as long as you continue to pay your monthly subscription fee.

Accessing Your Media Player's Channel Listings

It's easy to access and view the multimedia Channel Listings on your SCP-8300 by Sanyo from the phone's main menu.

To access your media player and Channel Listings:

1. Press  from standby mode to display the phone's main menu.
2. Select **Media Player**. Your Channel Listings will display, divided into the following two sections:
 - ▶ **My Channels:** These include the complimentary Previews channel and any available individual channels for which you have purchased access.
 - ▶ **Available Channels:** These are channels that have not yet been purchased but are available to access for a monthly subscription fee. Use your navigation key to scroll through and select a channel, and follow the onscreen instructions to purchase access to it. Upon purchasing access to one of these channels, the channel will be listed, along with its corresponding channel number, in the **My Channels** section of your media player's Channel Listings. You will see it displayed in this section the next time you access your phone's media player.

Playing a Video or Audio Clip

To select and play a media clip:

1. Press  from standby mode to display the phone's main menu.
2. Select **Media Player** to display your Channel Listings.
3. Use your keypad to enter a channel number (or use your navigation key to scroll to a channel and press ).
 - ▶ **My Channels:** If you have selected a channel that you've already signed up for (or if it's a channel with no monthly fee), you will see a list of available clips.
 - ▶ **Available Channels:** If you have selected a channel you have not yet signed up for, you will be prompted to accept the corresponding monthly charge. Follow the onscreen prompts to subscribe to the selected channel. (A list of available clips will display.)
4. Scroll to the clip you would like to play and press **Select** (left softkey) or . (The clip will automatically load and begin playing.)

Note: The first time you access one of your Available Channels, you will be prompted to accept the corresponding monthly fee (unless it's a channel that doesn't have an associated monthly fee). Accepting the charge gives you access to the channel for as long as you continue to pay the monthly fee. If you accept the fee, the next time you access your phone's media player, this channel will appear in the My Channels section of your Channel Listings.

Tip: When entering the specific channel number, channels 01 - 09 do not require you to enter a "0." For example, to access channel "07," just press the "7" key.

Multimedia FAQs

1. How does my phone's Multimedia Service differ from video messaging?

Multimedia Service lets you access high-quality video and audio clips provided by external sources. Video messaging lets you capture, upload and share videos that you personally create with your phone's built-in camcorder.

2. Will I know if I'm receiving an incoming call while I'm viewing or listening to an audio clip?

No. All incoming calls will roll into voicemail while you are playing a clip. If the caller leaves a voicemail, the voicemail icon will appear on the screen.

3. How long are the clips? Will I know the estimated time it will take to play the clip prior to accessing it?

Once you have selected a channel, you will see a listing of the available clips, with the clip's length appearing after the clip's title. In general, a clip's duration will depend on the story or content being provided, and can be fairly short or as long as a few minutes.

4. Can I access a multimedia clip wherever I am, as long as I have my phone?

As long as you are on the home network, you will have access to the audio and video clips.

Note: Multimedia Service does not work while roaming off of the home network or where service is unavailable.

5. After purchasing access to an Available Channel for a monthly fee, do I receive any confirmation? That is, how do I know it has been purchased?

The next time you access your media player's Channel Listings, the purchased channel title and corresponding number will appear in the My Channels section.

6. How can I easily access a channel without having to scroll through all the channels in my Channel Listings?

Each channel will have a number to the left of it. You can simply press this number to quickly access the clips located within that channel.

Tip: When entering the specific channel number, channels 01 - 09 do not require you to enter a "0." For example, to access channel "07," just press the "7" key.

7. What does it mean when the video pauses and I see the word "loading" at the bottom of the screen?

This happens when the media player is in the process of loading the data necessary to play the clip. It typically occurs when there is heavy traffic on the network.

8. If I place my stereo headphones on and insert them into the phone's headset jack, can I close the flip while I am playing an audio (or video) clip without interrupting the clip?

Yes. When you insert your stereo headset into the phone's headset jack, the phone automatically goes into "headset mode," allowing you to close the flip and continue playing the clip (likewise, if your phone is in "headset mode," a phone call will not become disconnected by closing the flip).

9. Can I surf to a different channel while I am playing a clip?

Yes. While you are playing a clip, you can use the up and down navigation keys to surf to a different channel. A small pop-up screen will appear that tells you which channel you are watching as well as other channels you have access to. Use the navigation keys to scroll through the different channels. Once you find a channel that you want to watch, scroll to it and press  (or simply wait approximately three seconds) and the channel will begin loading.

15. Safety Guidelines

Maintaining Your Phone's Peak Performance

- ▶ Try not to hold, bend, or twist the phone's antenna.
- ▶ Don't use the phone if the antenna is damaged.
- ▶ Avoid exposing your phone and accessories to rain or liquid spills. If your phone does get wet, turn the power off and immediately remove the battery.

Using Your Phone While Driving

Talking on your phone while driving (or operating the phone without a hands-free device) is prohibited in some jurisdictions. Laws vary as to specific restrictions.

- ▶ Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions.
- ▶ Do not take notes or look up phone numbers while driving.

Following Safety Guidelines

To operate your phone safely and efficiently, always follow any special regulations in a given area. Turn your phone off in areas where use is forbidden or when it may cause interference or danger.

Using Your Phone Near Other Electronic Devices

Most modern electronic equipment is shielded from radiofrequency (RF) signals. However, RF signals from wireless phones may affect inadequately shielded electronic equipment.

RF signals may affect improperly installed or inadequately shielded electronic operating systems and/or entertainment systems in motor vehicles. Check with the manufacturer or their representative to determine if these systems are adequately shielded from external RF signals. Also check with the manufacturer regarding any equipment that has been added to your vehicle.

Consult the manufacturer of any personal medical devices, such as pacemakers and hearing aids, to determine if they are adequately shielded from external RF signals.

Note: Always turn off the phone in health care facilities and request permission before using the phone near medical equipment.

Turning Off Your Phone Before Flying

Turn off your phone or set your phone to Airplane mode before boarding any aircraft. To prevent possible interference with aircraft systems, Transport Canada regulations require you to have permission from a crew member to use your phone while the plane is on the ground.

Turning Off Your Phone in Dangerous Areas

To avoid interfering with blasting operations, turn your phone off when in a blasting area or in other areas with signs indicating two-way radios should be turned off. Construction crews often use remote-control RF devices to set off explosives.

Turn your phone off when you're in any area that has a potentially explosive atmosphere. Although it's rare, your phone and accessories could generate sparks. Sparks can cause an explosion or fire, resulting in bodily injury or even death. These areas are often, but not always, clearly marked. They include:

- ▶ Any area where it is very humid and with inflammables.
- ▶ Fueling areas such as gas stations.
- ▶ Below deck on boats.
- ▶ Fuel or chemical transfer or storage facilities.
- ▶ Areas where the air contains chemicals or particles such as grain, dust, or metal powders.
- ▶ Any other area where you would normally be advised to turn off your vehicle's engine.

Note: Never transport or store flammable gas, liquid or explosives in the compartment of your vehicle that contains your phone or accessories.

Restricting Children's Access to Your Phone

Your phone is not a toy. Do not allow children to play with it as they could hurt themselves and others, damage the phone or make calls that increase your telephone bill.

Protecting Your Battery

The guidelines listed below help you get the most out of your battery's performance.

- ▶ Use only approved batteries, AC adapters, and chargers. These chargers are designed to maximize battery life. Using other batteries or chargers voids your warranty and may cause damage.
- ▶ In order to avoid damage, charge the battery only in temperatures that range from 0° C to 45° C (32° F to 113° F).
- ▶ Don't store the battery in a high humidity environment.
- ▶ Don't use the battery charger in direct sunlight or in high humidity areas, such as the bathroom.
- ▶ Never dispose of the battery by incineration.
- ▶ Keep the metal contacts on top of the battery clean.
- ▶ Don't attempt to disassemble or short-circuit the battery.
- ▶ Don't store the battery in high temperature areas for long periods of time. It's best to follow these storage rules:

Less than one month:

-20° C to 60° C (-4° F to 140° F)

More than one month:

-20° C to 45° C (-4° F to 113° F)

Disposal of Lithium Ion (Li-Ion) Batteries

For safe disposal options of your Li-Ion batteries, please ensure that disposal of this in accordance with law and regulation.

- ▶ Do not dispose of the battery in fire; the cell may explode.
- ▶ Do not open or puncture the battery; the released electrolyte is corrosive and may cause damage to the eyes and skin.

Special Note: Be sure to dispose of your battery properly. In some areas, the disposal of batteries in household or business trash may be prohibited.

Note: For safety, do not handle a damaged or leaking Li-Ion battery.

Cautions

Any changes or modifications to your phone not expressly approved in this document could void your warranty for this equipment and void your authority to operate this equipment. Only use approved batteries, antennas and chargers. The use of any unauthorized accessories may be dangerous and void the phone warranty if said accessories cause damage or a defect to the phone.

Although your phone is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending or sitting on it.
